### COMPANY PROFILE

#### Executive Summary

BOMA-Schleifmittel GbR is a family enterprise that manufactures cutting and grinding tools in Germany. BOMA is the supplier of a wide range of industries such as the refractory industry, material testing laboratories and service companies in Germany and worldwide both in the private and public sector, equipping them with high-quality grinding tools at reasonable prices. BOMA's priority is to respond flexibly to customers' requirements and to best accommodate their specific needs. Short operational and production paths and free choice of suppliers enable BOMA to provide the most suitable tailor-made solutions for each individual client.

As outlook for the future, BOMA pursues the expansive goal to supply selected innovative cutting and grinding tools along with personalized service to a large number of organizations around the globe. A continually optimized price-quality-performance ratio and reliable delivery form the basis for long-standing and trusting partnerships.

#### Company History and Team

The company was founded on 20 February 2001 as private civil law company (German: 'Gesellschaft bürgerlichen Rechts (GbR)') in Burgbrohl, Germany.
